ABOUT ME

I am a student of kenyan descent(**National ID 33176079**) currently pursuing a Bachelors of Science degree in computer Science in the University of Nairobi while concurrently working as a programmer dealing majorly with web development in python on the side as programming is my passion since 2015.

Always curious and learning new things in this vast realm of programming with my current interest being machine learning. I always give every project a personal touch as i am not in this only for the financial benefits but for fullfilment of purpose which i take with much gravity as a calling.
